

We've got you covered.

Coverage Guide

Annabell Duke mineral paint offers outstanding coverage and opacity. Our unique formula typically takes less product than other well known brands. 500ml of Annabell Duke paint will cover approximately 10 square meters. Full coverage in 1-2 coats.

Please note: coverage dependent on substrate, porosity and application method. Also dependent on colour selection and base colour you are covering. Typically light colours over dark bases may require more coats.
